

SELİM KOÇ

Full-Stack Software Engineer

Ankara, Türkiye | selokoc1@gmail.com | selimkoc.dev | github.com/Sselimkoc | linkedin.com/in/sselimkoc462

PROFESSIONAL SUMMARY

Full-Stack Software Engineer focused on building modern web applications from frontend to backend. I work mainly with React, Next.js, Node.js, Express.js and Python/FastAPI, with a focus on clean, type-safe and scalable solutions. I enjoy working on the architecture and backend side of applications, while also exploring AI and integrating AI-powered features into the products I build. Experienced in taking projects from development to deployment and working across the software development lifecycle.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React.js, Next.js, Vite, Tailwind CSS, Radix UI, Zustand, TanStack Query

Backend: Node.js, Express.js, Python, FastAPI, RESTful APIs, Socket.io

Databases & Cloud: PostgreSQL, MySQL, Supabase, Firebase

Testing & Tools: Git, GitHub, Postman, DataGrip, Selenium, Microsoft Power BI

AI / ML: Hugging Face, Gemini API, Whisper API, RAG, MCP

PROFESSIONAL EXPERIENCE

Junior Full-Stack Developer | Diyanet İşleri Başkanlığı 07/2025 – 11/2025

- Contributed to the design and development of citizen-facing web applications using a modular Next.js architecture.
- Helped identify and resolve performance issues in existing systems as part of ongoing maintenance efforts.
- Took part in several stages of the Software Development Life Cycle (SDLC), including design, development, testing, and deployment.

Web Developer Intern | Bitsody 03/2024 – 05/2024

- Assisted with the UI/UX design and frontend development of responsive web applications using React.js.
- Supported the optimization of backend database queries using DataGrip.
- Contributed to code refactoring and bug fixes to help improve the overall user experience.

Software Engineer Intern | Devlet Malzeme Ofisi 07/2023 – 09/2023

- Assisted in cleaning, analyzing, and visualizing enterprise procurement data to support decision-making.
- Contributed to a Power BI reporting project that used data processed through automated Python pipelines.
- Helped analyze tender criteria such as pricing structures, volume distributions, and logistics.

FEATURED PROJECTS

AIClipper — Multimodal Video Analysis System

Python, FastAPI, Next.js, Whisper API, Gemini API

- Architected an automated system that segments video and stream content, performing deep audio, text, and visual context analysis using Whisper and Gemini APIs to automatically detect key moments and generate dynamic highlights.

FeedTune — RSS & YouTube Content Manager

Next.js, Tailwind CSS, Radix UI, Zustand, TanStack Query, Supabase

- Architected a centralized content aggregation platform capable of processing multiple RSS feeds and YouTube subscriptions, utilizing a highly scalable data-fetching architecture and robust global state management.

GabiFlow — Low-Code Workflow Platform

React.js, Node.js, Express.js, MySQL, Socket.io, Tailwind CSS, Zustand

- Engineered a collaborative low-code platform empowering enterprises to visually construct, simulate, and execute complex business workflows with real-time multi-user synchronization.

EDUCATION

Ankara University | B.S. in Computer Engineering (2019 – 2024) | GPA: 3.58 / 4.00

CERTIFICATIONS & LANGUAGES

Languages: Turkish (Native), English (Professional Working Proficiency - B2)

Certifications: AI Hackathon (Anadolu Ajansı), Python for Data Science (Miuiul), Data Science Bootcamp (Aygaz), Python & TensorFlow for DS (BTK)
