

SELİM KOÇ

Full-Stack Software Engineer

Ankara, Türkiye | selokoc1@gmail.com | selimkoc.dev | github.com/Sselimkoc | linkedin.com/in/sselimkoc462

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with a solid academic foundation and hands-on expertise building scalable, high-performance web applications. Proficient in modern JavaScript/TypeScript ecosystems (React.js, Next.js, Node.js, Express.js) and robust Python backends (FastAPI), with a strong focus on type-safe development and API performance optimization. Proven track record managing the complete SDLC from architectural design to production deployment.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Radix UI, Zustand, TanStack Query

Backend: Node.js, Express.js, Python, FastAPI, RESTful APIs, Socket.io

Databases & Cloud: PostgreSQL, MySQL, Supabase, Firebase

Tools & AI: Git, GitHub, DataGrip, Microsoft Power BI, Hugging Face, Gemini API, Whisper API, Selenium

PROFESSIONAL EXPERIENCE

Junior Full-Stack Developer | Diyanet İşleri Başkanlığı

07/2025 – 11/2025

- Designed and developed new citizen-facing web applications, specializing in modular Next.js architecture.
- Maintained and optimized legacy systems by identifying, troubleshooting, and resolving critical performance bugs to boost overall stability.
- Managed the complete Software Development Life Cycle (SDLC) from initial architectural design to final production deployment.

Web Developer Intern | Bitsody

03/2024 – 05/2024

- Collaborated on the UI/UX design and frontend engineering of highly responsive web applications using React.js.
- Optimized complex backend database queries using DataGrip, significantly improving overall data retrieval efficiency.
- Implemented rigorous code refactoring and bug fixes to ensure high availability and a seamless end-user experience.

Software Engineer Intern | Devlet Malzeme Ofisi

07/2023 – 09/2023

- Cleaned, analyzed, and visualized complex enterprise procurement datasets to support data-driven executive decision-making.
- Architected and deployed a comprehensive enterprise reporting project using Microsoft Power BI, utilizing data processed with automated Python pipelines.
- Analyzed critical tender criteria — including pricing structures, volume distributions, and logistics — contributing to measurable operational process improvements.

FEATURED PROJECTS

AIClipper — Multimodal Video Analysis System

Python, FastAPI, Next.js, Whisper API, Gemini API

- Architected an automated system that segments video and stream content, performing deep audio, text, and visual context analysis using Whisper and Gemini APIs to automatically detect key moments and generate dynamic highlights.

FeedTune — RSS & YouTube Content Manager

Next.js, Tailwind CSS, Radix UI, Zustand, TanStack Query, Supabase

- Architected a centralized content aggregation platform capable of processing multiple RSS feeds and YouTube subscriptions, utilizing a highly scalable data-fetching architecture and robust global state management.

GabiFlow — Low-Code Workflow Platform

React.js, Node.js, Express.js, MySQL, Socket.io, Tailwind CSS, Zustand

- Engineered a collaborative low-code platform empowering enterprises to visually construct, simulate, and execute complex business workflows with real-time multi-user synchronization.

EDUCATION

Ankara University | B.S. in Computer Engineering (2019 – 2024) | GPA: 3.58 / 4.00

CERTIFICATIONS & LANGUAGES

Languages: Turkish (Native), English (Professional Working Proficiency - B2)

Certifications: AI Hackathon (Anadolu Ajansı), Python for Data Science (Miuul), Data Science Bootcamp (Aygaz), Python & TensorFlow for DS (BTK)
